*Use this template to divide your group in teams for the **Marshmallow Challenge** (<https://www.dedigitaletuin.nl/Marshmallow>) Print out the "Lootjes" or tickets with numbers on them. Make sure to print enough for everyone in your group (max 5 people for each group). Shuffle the tickets in a container and let everyone take turns drawing a ticket. Make sure no one looks at their ticket before they've drawn it! Once everyone has drawn a ticket, they will form a team with the people who have the same number as them. For example, everyone with the number "1" will form a team, everyone with the number "2" will form a team, and so on.*
